

Viya

AUTOMATIC

DISPOSABLE GLOVE DISPENSER

- **Enhance Hygiene:** The Viya dispenser is a touch-free, hygienic solution for glove dispensing and donning, reducing the risk of cross-contamination in clean rooms and laboratories.
- **Save Time:** Don a new glove effortlessly in less than 5 seconds per hand.
- **Reduce Waste:** Dispenses one glove at a time, optimizing usage and minimizing waste.
- **Boost Productivity:** Streamlined glove access enhances efficiency in labs, hospitals, and manufacturing environments where time is critical.
- **Promote Worker Satisfaction:** The user-friendly design improves comfort and overall employee satisfaction compared to conventional methods.

U.S. Pat. No. 11,889,936
U.S. Pat. No. 12,161,244

How it works:

- Load Glove Box: Insert the proprietary nitrile glove box into the top compartment of the dispenser.
- Hands-Free Dispensing: Wave your hand in front of the opening to dispense glove.
- Glove Application: The dispenser releases one glove at a time and draws a vacuum on the chamber to open the glove for seamless hand insertion.
- Indicate Donning: Make a fist to confirm the glove is donned, then twist your wrist to separate the glove from the cartridge.
- Effortless Disposal: Used cartridges drop into a removable drawer for convenient disposal.
- Refillable Design: With a capacity of 50 gloves, the Viya dispenser is ideal for clean rooms and laboratories.
- Waste Reduction: The design ensures that only one glove is dispensed at a time, optimizing usage and minimizing waste.

Availability:

- Contact Viya sales rep for availability or purchase directly at viya.us.
